## TECHNOLOGY REVOLUTIONISES DESIGN

FENIX is an innovative material consisting of 60% paper and 40% resins. It is manufactured through a special process in which heat and pressure are applied simultaneously in order to obtain a homogenous, non-porous product. The surface is extremely opaque, anti-fingerprint and pleasantly soft to the touch. Thanks to the nanotechnology applied to FENIX, there is superior resistance to surface scratches and abrasion. The high resistance properties of FENIX are achieved by the use of very small particles (nanoparticles) that are not visible to the naked eye. Through a high-tech production process, the nanoparticles are uniformly distributed and incorporated into the surface coating of FENIX. A phenolic birch plywood panel, double-sided coated in FENIX with visible edges with transparent matt varnish. The decision to leave the plywood visible, in addition to characterising it from an aesthetic point of view, guarantees greater resistance.

### LA TECNOLOGÍA REVOLUCIONA EL DISEÑO

FENIX es un material innovador compuesto por un 60% de papel y un 40% de resinas. Se elabora mediante un proceso particular en el que se aplica simultáneamente calor y presión para obtener un producto homogéneo y no poroso. La superficie es extremadamente opaca y antihuellas, agradable y suave al tacto. Gracias a la nanotecnología aplicada a FENIX se crea una resistencia superior a los arañazos superficiales y abrasión. Las propiedades de alta resistencia de FENIX se obtienen gracias al uso de partículas muy pequeñas (nanopartículas) que no son visibles a simple vista. A través de un proceso de producción altamente tecnológico, las nanopartículas se distribuyen uniformemente y se incorporan al revestimiento superficial de FENIX. Panel contrachapado fenólico de abedul, revestido a doble cara en Fenix con cantos vistos con barniz transparente mate. La elección de dejar el contrachapado expuesto, además de caracterizar desde el punto de vista estético el producto, garantiza una mayor resistencia al mismo.

### LA TECHNOLOGIE RÉVOLUTIONNE LE DESIGN

FENIX est un matériau innovant composé à 60 % de papier et à 40 % de résines. Il résulte d'un procédé particulier par lequel la chaleur et la pression sont appliquées simultanément afin d'obtenir un produit homogène et non poreux. La surface est extrêmement mate, anti-traces de doigts et agréablement douce au toucher. La nanotechnologie dont FENIX fait l'objet assure une meilleure résistance aux rayures de surface et à l'abrasion. Les propriétés de haute résistance de FENIX dépendent de l'utilisation de très petites particules (nanoparticules), qui ne sont pas visibles à l'œil nu. Grâce à un procédé de fabrication de haute technologie, les nanoparticules sont uniformément réparties et incorporées dans le revêtement de surface de FENIX. Panneau en contreplaqué phénolique de bouleau, revêtu sur les deux faces en Fenix et bords visibles en vernis mat transparent. La décision de laisser le contreplaqué apparent caractérise le produit d'un point de vue esthétique, mais cela garantit également une plus grande résistance à l'usure.

### TECHNOLOGIE - REVOLUTION DES DESIGNS

FENIX ist ein innovatives Material, mit einem Anteil von 60 % Papier und 40 % Kunstharz. Es entsteht durch einen speziellen Fertigungsprozess, bei dem durch die gleichzeitige Einwirkung von Wärme und die Ausübung von Druck ein homogenes, nicht poröses Produkt entsteht. Seine Oberfläche besitzt eine extrem matte Ausführung, auf der keine Fingerabdrücke sichtbar bleiben und zeichnet sich gleichzeitig durch eine angenehm weiche Haptik aus. Dank der eingesetzten Nanotechnologie ist FENIX außerdem hoch-beständig gegenüber Kratzern auf der Oberfläche und Abrieb. Die ausgeprägte Robustheit von FENIX wird durch den Einsatz besonders kleiner Elemente, sogenannter „Nanopartikel“ erzielt – so klein, dass sie mit bloßem Auge nicht sichtbar sind. Mit Hilfe eines hochtechnologischen Fertigungsprozesses werden sie gleichmäßig verteilt und in die Oberflächenbeschichtung von FENIX integriert. Birken-Multiplexplatte mit Phenolharz, beidseitig mit Fenix beschichtet, naturbelassene Kanten mit matt-transparenter Lackierung. Die Entscheidung, das Multiplexholz sichtbar zu lassen charakterisiert das Produkt nicht nur optisch, sondern verbessert gleichzeitig auch seine Beständigkeit.

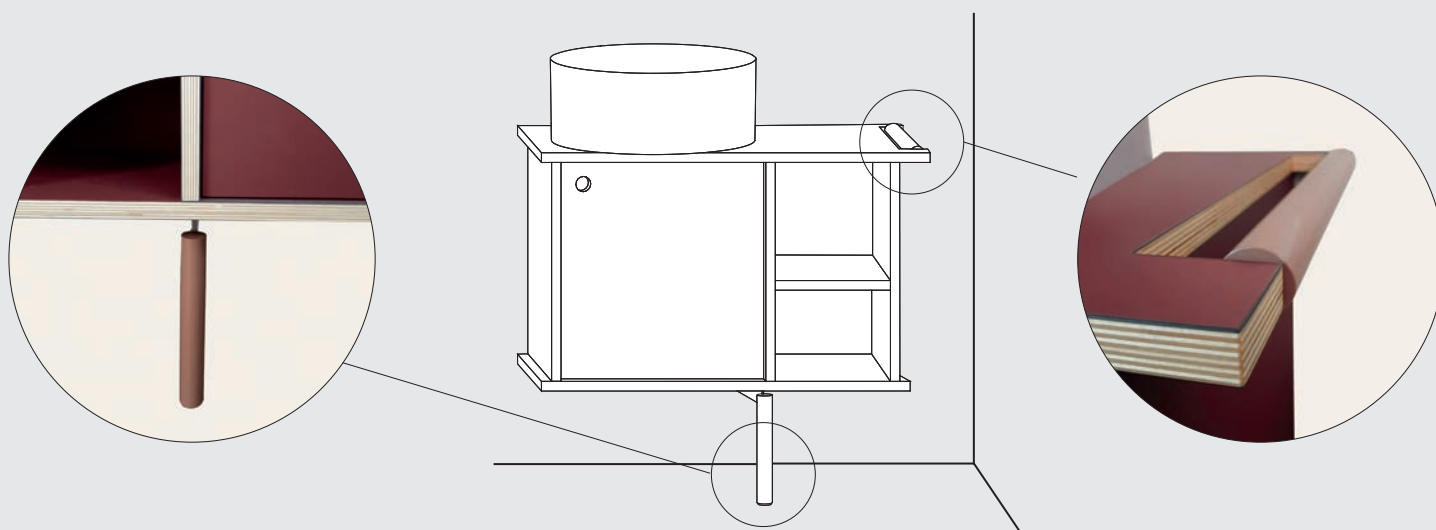

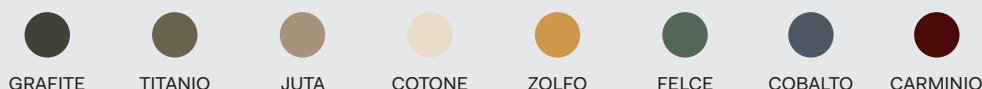

### Технологии

#### революционируют дизайн

FENIX – это инновационный материал, состоящий на 60% из бумаги и на 40% из смолы. Данный материал производится в результате особого процесса, при котором одновременно применяются тепло и давление для получения однородного и непористого продукта. Поверхность материала совершенно матовая, приятная на ощупь и на ней не остаются отпечатки. Благодаря нанотехнологиям, применяемым в материале FENIX, поверхность отличается превосходной устойчивостью к царапинам и стиранию. Высокая устойчивость FENIX достигается за счет использования очень мелких частиц (наночастиц), невидимых невооруженным глазом. Благодаря высокотехнологичному производственному процессу наночастицы равномерно распределяются и включаются в поверхностное покрытие FENIX. Панели из березовой фанеры с двухсторонним покрытием Fenix и матовым прозрачным лаком, с незакрытой кромкой. Незакрытая кромка помимо эстетического эффекта гарантирует большую устойчивость материала.

Every item possesses that particular feature of being processed according to purely traditional principles that guarantee its absolute originality and uniqueness. The small variations in colour, hues or streaks on the items are to be considered as qualities and not defects, since they warranty the handcrafted processing which makes each Cielo item a unique and exclusive piece that cannot be compared to industrial standardization. Ogni oggetto possiede la peculiarità di essere elaborato secondo principi puramente tradizionali, in modo da garantirne l'assoluta originalità ed unicità. Le eventuali piccole variazioni di colore, tono o venature fra gli articoli sono da considerarsi pregi e non difetti, in quanto garanzia della fattura manuale del prodotto, che fa di ogni oggetto Cielo un pezzo unico ed esclusivo, lontano dall'omologazione industriale. In fase d'ordine si intendono, pertanto, accettate tali tolleranze che non possono dare adito a contestazioni di alcun genere.

Verificare sempre le disponibilità e i tempi di consegna con il commerciale.

ATTENTION:

Every item possesses that particular feature of being processed according to purely traditional principles that guarantee its absolute originality and uniqueness. The small variations in colour, hues or streaks on the items are to be considered as qualities and not defects, since they warranty the handcrafted processing which makes each Cielo item a unique and exclusive piece that cannot be compared to industrial standardization. When making the order, the client implicitly accepts those various features that may give rise to claims of any sort.

Always check the availability and delivery time with the commercial department.
